Workshop for Atal Tinkering Lab (ATL)

NITI-Aayog, Government of India took initiative of setting up the ATL Tinkering Labs, Where students can work together on innovative projects.

It is a flagship innovation programme for encouraging ideas of innovation and entrepreneurship among the students.

St. Cecilia's Public School feels honoured to be a part of the workshop on innovation, conducted by Ved Vyas Dav Public School, Vikaspuri on 15th April 2019, Monday.

The workshop was conducted to celebrate the ATL Community Day.

Students of our school went there to participate in various activities conducted by the school.

According to the experience shared by some of the students, We get to know that they were divided into groups, alongwith the students of other schools (on the basis of their classes).

Students of class VI got an opportunity to create objects with balloons.

Students of class VII made 'Toy Cars' with balloon and class VIII and IX did 'electrolysis' and 'soldering' respectively. Students of class X observed the ATL labs and they found models of Drones, Cars operated by Bluetooth and laptops with 3D printers.

Students were mesmerized after this workshop and they got to learn this basic idea : 'to do the common things in an uncommon way'.
