

St. Cecilia's Public School

Stream Selection Workshop

The School organized a workshop on stream selection for Class-IX and X students on 16th May 2017 in 2 different batches. The resource person Mr. Anubhav was from Pratham.

He made students aware of different world of work, areas of interest, areas of ability and options available after Class-XII in specific stream chosen in XI.

Mr. Anubhav paid lot of emphasis on the specific style of choosing interested field/stream that is humanities, Commerce (with/without Maths) and Science (Medical/Non Medical).

So for choosing a field a specific method students can use is-

- (1) Selection
- (2) Elimination

Sometimes our selections & elimination of stream can have effect of few things like

- (1) Comparison
- (2) Herd Mentality
- (3) Social Status
- (4) Expectations

Later, he emphasized in his last segment that how students can apply for Foreign Universities. Now to save their time later as score entrances are valid for 5 good years.

So to apply in foreign universities students need good academic record, co-curricular certificate, international entrance exam score, NGO & Social work certificate.

So over all he gave in depth information regarding the career opportunities & the related streams.
