

St. Cecilia's Public School

Maths Club Activity

Class: IV

Report

Date: 10.04.26

Organizer: Maths Club (Primary wing)

Topic: Number Names and Place Value Chart

The Maths Club conducted an engaging and interactive activity for Class IV students on the topic “*Number and Numeration*”, focusing on number names and place values.

Students used number cards (0–9) from the MOJO Maths Kit to form 6-digit numbers. They were provided with A-4 activity sheets marked with place value columns (Ones, Tens, Hundreds, Thousands, Ten Thousand, Lakhs) as a guide. With great enthusiasm, students arranged the number cards correctly to create different 6-digit numbers.

Once the numbers were formed, students practiced reading them aloud and writing their number names. This hands-on activity helped them understand the concept of place value in a clear and practical way. It also improved their confidence in reading large numbers accurately.

The activity encouraged active participation, critical thinking, and peer learning. Students showed keen interest and enjoyed the learning process through this fun and meaningful approach.

Overall, the activity was successful in strengthening the students' understanding of number formation and place value.
