

# St. Cecilia's Public School Cyber Safety Workshop Classes VI-XII

*“Technology is a useful servant, but a dangerous master”*

As the technology is increasing its range, our students need to adapt to the changes while keeping themselves safe as every coin has two sides. If technology is not used in right direction it can be disastrous. Today we all are using smartphones, computers for browsing information, project work, booking tickets and many other such tasks. Sometimes we need to provide our personal information on many websites. But there have been many instances, where the information is hacked or stolen and cyber frauds occur. So, to make the students aware about the security on Internet, a workshop on **Cyber Safety** was organized for the students of **Classes-VI –XII** in the month of **August**.

Students were explained through **PPT** the meaning of **Cyber Safety** and how websites track us. They were also made aware about **Cyber Crimes** like Phishing, Cyber Stalking and Cyber Bullying through videos. Also, they were acquainted with practices to ensure confidentiality of information and **Social Media Etiquettes**.
