

St. Cecilia's Public School
ECO CLUB ACTIVITY HELD ON 22.06.2021
CLASSES IX TO XII

Japneet Kaur
Class XI D1

Eco Club of St. Cecilia's Public School, Vikaspuri, New Delhi organized a creative and productive hands on activity for the students of Classes 9th to 12th on 22nd June, 2021 . The background of the activity lay in the basic tenet of prevention being better than cure. In the present context of the global battle against Corona, prevention has emerged as the most important , inevitable and quintessential tool for survival and sustenance. With this theme in mind, the eco club gave in a unique opportunity to students to make their own face masks, gloves, sanitisers with the help of eco friendly materials available at home.

The creativity of the students saw a full bloom wherein they used the nature friendly material available to them at home and with the power of their imagination converted them into a useful tool for prevention against air borne infections. Students were also encouraged to explore more about home made sanitisers and masks from the diverse scientific journals and published sources. Students actively participated in the activity and shared their works on the online platform with their class teachers, class mates and the eco club incharges. The activity was conducted in the Class Teacher Session wherein students could share in their experiences on virtual live platform. It was an energizing experience to see the young minds at work , trying to use their creativity to the best to develop an item of utility.

The significance of masks and sanitisers is inevitable in the present time. Students came together in unison to stand up for this global cause of emphasizing the importance of prevention rather than going to the way of cure. Social responsibility, personal duty , moral emphasis and environmental ruling all came into play to encircle the activity with the bliss of productivity and utility. It was just a very small step in the right direction. As each and every drop contributes towards filling up the ocean, the endeavor of the eco club was to initiate the movement leading to an oceanic existence.

Madam Principal, Madam Co-ordinator, Class Teacher, Subject teachers all supported and encouraged the children in this humble endeavor. The activity emerged as a great hands on learning experience for the children in the true fervor of social and environmental justice.
