Earth Day Quiz

The Quiz Club (Middle Wing) hosted an engaging Earth Day quiz on 6 May 2026 with an objective to create environmental awareness and responsible habits. It aimed to broaden students' understanding of how recycling, conservation and eco-friendly practices contribute to a sustainable future.

The session began with a class discussion to enhance students' knowledge of environmental issues, the importance of protecting natural resources and practical ways to reduce waste in daily life.

The activity-based quiz not only enhanced knowledge but also encouraged teamwork and critical thinking while helping students appreciate the impact of small, consistent actions on the planet.

The event saw enthusiastic participation and active learning, leaving students with a stronger sense of responsibility towards the environment and practical ideas to adopt greener practices at home and in school.
