

St. CECILIA'S PUBLIC SCHOOL
MENTAL MATHS SESSION
CLASS IV AND V
TOPIC - BASIC OPERATIONS
DATED: 07.05.24

The mental maths session conducted for Class 4 and 5 students focused on improving their calculation skills through a PowerPoint quiz format featuring ten questions covering addition, subtraction, multiplication, and division. This interactive approach not only encouraged students to calculate quickly but also reinforced fundamental mathematical concepts. Active participation and enthusiastic engagement were evident throughout the session, fostering a positive learning environment. By successfully answering questions, students gained confidence in their mathematical abilities, highlighting the effectiveness of the session in enhancing their overall proficiency. Moving forward, regular practice sessions, variation in activity formats, feedback mechanisms, and integration into the curriculum are recommended to sustain and further develop students' mental maths skills.
