## MAP ACTIVITY

### TOPIC – MOUNTAIN RANGES OF INDIA

DATE: 6<sup>th</sup>Nov'24

A Map Activity was conducted on 6<sup>th</sup>Nov'24 for classes VI to VIII. The theme of the activity was 'Mountain Ranges of India', in which students were made to identify and locate the different mountain ranges on the physical map of India.

The primary objective of the activity was to accustom students with the various mountain ranges of India by identifying and label these ranges on a physical map. Through this exercise, students got to understand India's diverse topography, the geographical significance of these mountain ranges, and their role in climate and biodiversity.

The map labelling activity was an effective and interactive way to introduce students to the concept of mountain ranges in India. It not only helped them learn about the physical geography of the country but also promoted critical thinking and research skills. The exercise further encouraged teamwork, as students shared insights and discussed different aspects of each range. Overall, it was a successful event in engaging the students and increase their understanding of India's landscape.
