Quiz Club – Middle Wing
Map Activity on Continents and Oceans of the World

The Quiz Club continued its series of engaging map activities with a session on marking continents and oceans on a world map on 04.04.2026.

Students of Classes VI-VIII enthusiastically identified and located the seven continents and five major oceans on the world map. Through this activity, they strengthened their spatial awareness and gained a clearer understanding of Earth's land and water distribution.

The hands-on exercise developed students' map-reading skills, sparked curiosity about global geography and made learning interactive and enjoyable. It also deepened their connection with the world's physical features and laid a strong foundation for exploring cultures, climate and resources across continents.
