

St. Cecilia's Public School

Maths Quiz

Date : 10.12.25

Mathematics is not about numbers, but about logical thinking.

With the aim of making Mathematics engaging and enjoyable, the mathematics Club of St. Cecilia's Public School organised a Maths quiz for students of classes VI to VIII. The event was designed to promote logical thinking, improving problem- solving skills, and developing a positive attitude towards Mathematics. It was conducted in a lively and well-planned manner, creating an atmosphere of enthusiasm and healthy competition among the participants. Students from different classes took part with great interest and confidence.

The questions covered a wide range of topics based on the prescribed syllabus along with general mathematical awareness. This helped students apply their classroom learning in a practical and engaging way. The participants demonstrated sharp thinking, accuracy, teamwork, and the ability to perform well under time pressure.

The quiz proved to be an effective learning experience beyond the regular classroom setting. It helped students build confidence, improve concentration, and develop a deeper interest in mathematics. Overall, the event organised by the Mathematics Club was successful and meaningful, motivating students to strengthen their mathematical skills and participate actively in future academic activities.
