

ST. CECILIA'S PUBLIC SCHOOL
SESSION – 2025-26
CLASS 1
Pre-Number Concepts

Objective- To reinforce students ability to establish a foundation for understanding numbers and maths skills.

A hands on activity was conducted for class 1 students on 8 may 2025 to reinforce their understanding of pre number concepts. Students focused on spatial relationship such as the difference in shapes, picking out between small and big, light and heavy, short and long, wide and narrow, thick and thin etc. This way, children learn to observe the attributes of quality, quantity and finally numbers. The understanding of pre-number concepts enables children to fundamental mathematical abilities. Instead of jumping straight into numbers, pre-number concepts focused on sorting, comparing, and recognizing patterns.
