

St.Cecilia's Public School Earth Day Celebration

To reinforce the message that our consistent efforts in daily life will enable this planet to flourish, St. Cecilia's Public School (Pre-Primary Wing) observed Earth Week from 15th

April to 22nd April 2026, culminating in a series of activities designed to be engaging and insightful for the young learners.

To mark the occasion, teachers presented audio-visual content that served as a reminder of students' responsibilities towards 'Mother Nature'. A key highlight was the Germination Activity conducted with the Headmistress ma'am, wherein students learned the process of sowing and nurturing saplings, learning that a small contribution makes a big impact.

The young learners arrived dressed up in shades of green, embodying the spirit of the day. They expressed their commitment through vibrant and enthusiastic dance performances to promote the message of environmental care.

They also participated in poster-making sessions and in creating innovative articles from discarded materials such as disposable glasses, reinforcing the principle of reusing waste.

The week-long celebration helped the little Cecilians learn the need to safeguard Mother Nature.
