

St Cecilia's Public School
Geekoz IT-Club
Programming in Python
Senior Wing
Classes XI and XII

Geekoz IT-Club aims at developing IT skills in school students and enhances their knowledge in the field of technology. It also aims at developing and testing their programming skills for making them capable and proficient to join the IT industry.

Students of classes XI and XII participated in a programming competition held on 29.10.2024. Students were given programming problems to be solved using Python language according to the level of the class. They used their programming and logical reasoning skills to solve the programming problems. To encourage maximum participation, the competition was open to all the students of classes XI and XII.

The competition was organized and judged by Ms. Prajjya Dutta, Geekoz IT-club incharge. School principal Ms. Inderpreet Bhumra encouraged and motivated the students to actively participate and learn in the process to perform better. The winners were awarded certificates and medals.
