

St. Cecilia's Public School
Creating Awareness on Rain Water Harvesting among Students
Eco Club

Eco Club of St. Cecilia's Public School, Vikaspuri in compliance with the circular no. DE- 40(6) /13/SCB/2021/917-20 by the Directorate of Education : Science and TV Branch, Government of National Capital Territory of Delhi initiated to create awareness on Rain water Harvesting among students of all classes I to XII. Delhi Jal Board is responsible to provide clean , safe and sufficient water to all citizens of Delhi. Due to rise in population and limited surface resources , the ground water resources are stressed. Therefore, it is necessary to use alternate means of water conservation, so that the ground water resources are preserved. Delhi Jal Board has taken initiative to raise ground water aquifers by adopting alternate means of surface water consumption like Rain water harvesting . Rain Water Harvesting is the cheapest mode of water conservation . School children being the future of India are necessary to be educated on importance of water and its conservation through Rain water Harvesting. Hon'ble Lt Governor has been regularly reviewing the progress in this regard and has emphasized on public outreach through schools . Eco Club of our School came in full support of this initiative and organized awarenesssessions for students of all classes in this regard. Class teachers and subject teachers via the mode of online and offline interactions took this endeavor of spreading the necessary knowledge and building the requisite aptitude to take this initiative further. Madam Principal, Madam Co-ordinator and all the teachers actively motivated the students to inculcate the principles of Rain water Harvesting in their daily life and try to be use the rain water harvesting techniques to their best. Students emerged as eco warriors to implement and strengthen the campaign.
