

St. Cecilia's Public School MS-Paint Competition

Geekoz IT Club organized an MS-Paint Competition for **Class II** students on **16th February 2026**. The theme of the competition was “**Holi Scene**”. The event aimed to encourage creativity and enhance students' computer skills in a fun and engaging way.

All the students participated with great enthusiasm and excitement. Using MS-Paint, they created beautiful and colourful drawings based on the Holi festival. Many students illustrated scenes of children playing with colours, spraying water with pichkaris, throwing water balloons, and enjoying bright splashes of different colours. The artwork displayed their imagination, creativity, and understanding of the festival.

The competition provided a wonderful opportunity for students to explore various tools in MS-Paint, such as brushes, shapes, fill colours, and text options. It helped them improve both their drawing abilities and basic computer skills.

Overall, the competition was a grand success. The students thoroughly enjoyed the activity, and Geekoz IT Club looks forward to organizing more such creative and educational events in the future.
