St. Cecilia's Public School
Workshop: "Safety on Social Networking Sites"
Organized by: Geekoz IT Club
Classes Covered: I – V
Date: 10-11-2025 to 12-11-2025

The **Geekoz IT Club** organized an informative workshop on **"Safety on Social Networking Sites"** for students of Classes 1 to 5. The session aimed to create awareness among young learners about the proper and secure use of the internet and social media. The workshop was presented through a colorful and engaging **PowerPoint presentation** prepared by the club members.

The presentation began with an introduction to popular social networking sites such as YouTube, Facebook, and Instagram. Students learned how these sites are used for communication, learning, and sharing ideas. The next slides focused on possible **threats** such as cyberbullying, fake profiles, misuse of personal information, and spending too much time online.

The presenters also explained **what to do after facing an online threat**—students were advised to stay calm, inform parents or teachers immediately, block and report suspicious users, and avoid sharing personal details.

Overall, the session was highly engaging and helped young students understand the importance of being safe and smart digital citizens.
