

St. Cecilia's Public School
Class –III Presentation
Theme: Save Earth Save Life
Date: 16.05.2025

The Earth is not just a planet, it's our home and every home deserves to be protected.

On the 16th of May the students of **Class 3** presented a thoughtful and inspiring program on the theme "**Save Earth, Save Life**". The presentation was aimed to spread awareness about protecting our planet and making sustainable choices for a better future.

The program began with presenting to the dignitaries followed by a soul-stirring prayer.

Afterwards the students presented a dance performance on nature and its conservation which was lively and meaningful.

The students displayed the harmful effects of pollution, deforestation, and water wastage. The young performers effectively conveyed how these actions hurt the Earth and the need for small changes in our daily lives that can make a big difference. These were beautifully depicted through power point presentations, working models, models made from waste, posters, skits, nukkad naatak, dances and songs etc. The topics varied from –‘Save trees’ to use electric vehicles, each one laying stress on environmental issues and sustainable practices.

Students exhibited colourful placards with messages like "*Reduce, Reuse, Recycle*", "*Plant Trees, Save the Earth*", and "*Say No to Plastic*". Their enthusiasm and creativity truly captured the attention of the audience.

Overall, the presentation was not only enlightening but also impactful.
