

St. Cecilia's Public School
To check adulteration in food samples
Scientia Club

Scientia club activity has been conducted in IX and X classes on 12th May 2022 and in XII class on 25th May 2022. The activity has been conducted by the students of class XII A under the guidance of Scientia club incharges. The activity shown to students was to check adulteration in food samples.

- a) Through observations
- b) Through chemical test

Activity: To check adulteration in

1. Milk
2. Chilly powder
3. Turmeric powder

The motive of activity was

1. To build up scientific temperament among students
2. To relate activity in day to day life to understand importance of science
3. To build up interest in students regarding scientific methods.

Students of IX, X and XII participated in the activity with full enthusiasm by giving response to the questions posed by senior students.

Hence this activity, learning by doing helped the students to build up scientific temperament and it promotes out of box thinking.
