

St. Cecilia's Public School "Scratch Gaming Competition"

Date	13.05.26
Name of event	Scratch Gaming Competition

The Scratch Gaming Competition was organized by Geekoz IT Club to encourage students to develop creative and interactive games using Scratch. Participants designed games featuring **timer** and **score** variables, showcasing their coding, creativity, and problem-solving skills.

The competition witnessed enthusiastic participation, with students presenting a wide variety of innovative games based on different themes. The entries were judged on creativity, coding logic, gameplay, user experience, and effective implementation of Scratch features.

The entries were judged on gameplay, innovation, and effective use of Scratch programming concepts. The competition was a great success and inspired students to enhance their programming abilities through game development.
