

St. Cecilia's Public School
Maths Club
Activity: Vedic Maths
Class: VI-VIII
Date: 9th and 10th May, 2023

“Mathematics is in its own way, the poetry of logical ideas”

-Albert Einstein

Creativity is present in all individuals within their unconscious minds. Mathematics helps develop children's thinking skills and is important for children to be able to think creatively. It allows children to have fun with numbers.

The Vedic Maths activity was organized in the Primary and Middle wing by the selected students of the preliminary round. Students demonstrated mathematical operations by teaching their juniors easy and fun tricks. The presentations were basic and concise so that they could lead to simplification of students' doubts. It turned out to be an enriching and insightful experience for both the presenters and the learners.

Students of classes IV-VIII enjoyed and learnt the tricks. It was a fun filled activity which gave the students a chance to enhance their calculation skills. Developed and perfected over thousands of years ago by Indian mathematicians, Vedic Maths makes learning the subject fun, fast and fantastically amazing.
