Verbal and Non-Verbal Reasoning Ability Quiz

“Logic is the beginning of wisdom, not the end”

-Leonard Nimoy

Logical thinking skills are a set of abilities that allow one to solve problems effectively. They enable the students to give well-thought-out responses to any problems that arise. Structure, linkages between facts, and chains of reasoning that “make sense” are all required in logical thinking problems or circumstances. They also provide the ability to make decisions that the majority of people would deem rational. Also they form an important integral part of all entrance and competitive examinations.

Hence, to inculcate logical thinking among students, the quiz club organized a pen or paper – ‘Verbal and Non-Verbal Reasoning Ability Quiz’ on May 17, 2023 for the students of Class XI and XII. All students from these classes participated in the quiz with zeal to crack the given verbal and non-verbal questions successfully.
