The IT Club organized a **Website Designing** Competition using **HTML** to promote creativity and coding skills among students. Participants designed attractive and functional web pages, showcasing their knowledge of HTML elements and webpage design.

The event provided a platform for students to apply their technical skills, think creatively, and enhance their interest in web development. Madam Principal encouraged the students to put more efforts on adding interactive elements on web pages. The competition concluded successfully with enthusiastic participation and outstanding performances by the students.
